Vacancy – Heavylift Engineer

Permanent Position

Malin Marine Consultants Limited are specialists operating in the field of Naval Architecture, Structural Analysis and Heavy Lift Transportation Engineering.

We are looking for a qualified Naval Architecture or Structural Engineer with at least 2 years experience in the Heavylift and Project Cargo Transportation industry to complement our growing team based in the centre of Glasgow.

The successful candidate must be computer literate, and have practical experience in Structural Analysis applied to the transportation of abnormal cargoes. Any experience in Hydrodynamic Analysis would also be of benefit.

Experience in FEA software, CAD skills (AutoCAD, MicroStation or similar) and working knowledge of Naval Architectural software non essential but an advantage.

Typical day to day tasks would involve:

- Hatch and ship structure strength checks
- Seafastening design
- Loadout ballast calculations
- Design of lifting arrangements and rigging studies
- On site supervision of project cargo loadout, seafastening, and loadin operations by crane or SPMT.
- Transport and access studies

Travel will be required on occasion both within the UK and abroad.

Excellent opportunities exist for hard-working, motivated applicants able to work within a team framework and develop their career within this fast growing consultancy on a varied range of projects.

To express interest, please apply in writing either by post or email, complete with C.V., to:
